PROFESSIONAL SUMMARY

Cloud & Infrastructure Engineer with 2.9+ years of experience in enterprise monitoring, observability, incident management, and cloud operations. Skilled in Google Cloud Platform (GCP), Microsoft Azure, Dynatrace, Linux Administration, and AI-driven observability solutions. Proven track record of maintaining 99% SLA compliance and ensuring high availability across enterprise environments. Seeking opportunities in Cloud Engineering, Site Reliability Engineering (SRE), and DevOps.

CORE COMPETENCIES & TECHNICAL SKILLS

Google Cloud Platform (GCP) | Microsoft Azure | Dynatrace (Essentials Certified) | Application Performance Monitoring (APM) | Full-Stack Observability | Distributed Tracing (PurePath) | Smartscape Topology Mapping | Davis AI Root-Cause Analysis | Log Analytics (DQL) | Azure Monitor | Infrastructure Monitoring | Monitoring & Alerting | Incident Management | Root Cause Analysis (RCA) | SLA Management & Service Operations | Linux Administration | Windows Server Administration | PowerShell Scripting | Python | Micro Focus NNMi & OBM | SiteScope | Java | C | C++ | GitHub

PROFESSIONAL EXPERIENCE

LTIMindtree – Cloud & Infrastructure Engineer (Sep 2023 – Present, Kolkata)

- Managed monitoring and operational health of 500+ Windows and Linux servers across enterprise hybrid environments, contributing to approximately 99.95% service availability.
- Resolved 50+ high-priority incidents and service requests weekly using Remedy and ServiceNow, achieving approximately 99% SLA compliance and minimizing business impact.
- Reduced Mean Time to Resolution (MTTR) by approximately 25% through proactive infrastructure monitoring, swift alert investigation, and detailed Root Cause Analysis (RCA).
- Delivered daily, monthly, and quarterly infrastructure performance reports to stakeholders, identifying capacity bottlenecks and trends to ensure infrastructure stability.
- Coordinated 30+ planned maintenance windows and downtime schedules while proactively informing cross-functional teams about critical distributed infrastructure issues to ensure zero operational disruption.

CERTIFICATIONS

- **Google Cloud Certified** – Associate Cloud Engineer (ACE)
- **Dynatrace Certified** – Dynatrace Essentials
- **LTIMindtree CIS** – Certified Cloud, Infrastructure & Cybersecurity Services Professional (Windows Server, RHEL 7, Cisco, Virtualization, PowerShell, Azure & DevOps Dashboard)
- **FlexonLabs Industrial Training** – Web Development using PHP & MySQL
- **PATHFINDER Academy** – Advanced Programming Training (C, Java, Python & Oracle)

TECHNICAL PROJECTS

Enterprise APM & AI-Driven Observability Ecosystem (Dynatrace Lab POC)

Project Link: <https://rohanmukherjee01.github.io/Dynatrace-Enterprise-Observability-Suite/>

- Built and scaled a full-stack observability platform across hybrid Ubuntu environments to monitor critical microservices and 23+ active processes in real time.
- Designed custom visualization dashboards and DQL-based log analytics that reduced critical troubleshooting time by approximately 40% and enhanced incident visibility.
- Leveraged Davis AI anomaly detection and Smartscape topology mapping to achieve automated root-cause analysis, cutting down false-positive alert noise by approximately 30%.
- Utilized Dynatrace PurePath and Service Flow to trace distributed transactions and application metrics (throughput, response time, error rates), identifying network latency bottlenecks by approximately 20%.

Scalable Google Cloud Infrastructure & Automation (POC)

Project Link: <https://rohanmukherjee01.github.io/GCP-Infrastructure-Automation-POC/>

Tech Stack: Compute Engine, VPC, Cloud Load Balancer, Terraform, GKE, Cloud Run, Cloud Monitoring.

- Core Infrastructure & Networking: Provisioned Compute Engine virtual machines and designed custom networks. Implemented Cloud Load Balancing to efficiently distribute incoming application traffic.
- Automation & Containers: Automated the provisioning of cloud infrastructure using Terraform (Infrastructure as Code). Deployed containerized applications using Google Kubernetes Engine (GKE) and serverless Cloud Run.
- Database & Observability: Evaluated and deployed appropriate Google Cloud databases based on specific application requirements. Configured Cloud Logging and Monitoring to ensure complete infrastructure observability and health tracking.

EDUCATION

- **Bachelor of Computer Applications (BCA)**

Maulana Abul Kalam Azad University of Technology (MAKAUT)

2020 – 2023 | CGPA: 8.76

- **Higher Secondary (10+2)**

W.B.C.H.S.E | 2018 – 2020 | 76%

- **Secondary (10th)**

W.B.B.S.E | 2018 | 80%
